

**PLATE DISPENSERS**

**A wide range**

Tournus makes a complete range of plate serving trolleys for all types of use:

- Heated trolleys for one or two piles of plates.
- Neutral trolleys for one or two piles.
- "Universal" trolleys" with a rectangular platform, that can be neutral or heated, for all types of crockery (bowls, saucers, oval or round plates).
- Built-in distributors, neutral or heated.

**Easy to use**

On each trolley, the dispensers for the piles of plates are removable. The trolley interiors are radiused at bottom and sides, with drainage from the bottom, so cleaning is very easy.

The dispensers are easy to adjust according to the diameter of the plates, simply by changing the position of the three guide wires, with no need for tools.

**Very efficient**

Thanks to the extremely powerful heating elements installed in the heated models, and the highly efficient rock wool insulation, the trolley heats up quickly and the temperature inside is very even in all areas. So power consumption is optimised.

Heated trolley

Universal trolley

Removable element

Tray trolley

Trolley with side guides

Cutlery dispenser

**NEW**

**GLASS OR TRAY DISPENSERS**

**Practical**

The range consists of trolleys for baskets of glasses and trolleys for trays.

The platform edges on the trolley are flattened to avoid any risk of cuts for the user. The mobile part of the trolleys is guided by 4 guide rolls fitted on ball bearings, to guarantee platform stability and excellent durability for the whole.

The presentation level is adjusted according to the weight of the glasses or trays by adding or removing springs, which are easily accessible under the cover. One of the trolleys comes with side guides to optimise stacking of the plates as they leave the conveyor. An optional cutlery dispenser is proposed, and is easily fixed to the trolley with two screws (capacity: 3 GN 1/3 containers).

- Stainless steel construction
- Interior angles radiused to make cleaning easier.
- Steering handle made of stainless steel tube, diameter Ø 25 mm.
- 4 moulded polyethylene protective buffers
- For plates Ø 180 to 290 mm, stacking height 580 mm, i.e. about 60 plates.

- Plate support tray with 3 guide wires, presentation level adjusted by adding or removing springs depending on the weight of the plates.
- Transparent polycarbonate lids on the heated trolleys, stainless steel lids on the universal trolleys (as an option on the neutral trolleys).
- 4 x Ø 125 mm swivelling wheels with polyamide cover, of which 2 are braked.

**Specific features of the heated trolleys :**

- Switched on by On/Off switch with lamp.
- Heating controlled by mechanical thermostat adjustable from 0°C to 90°C.
- Spiral cable (maximum stretch 2 metres) with moulded plug.
- Heated by 2 stainless steel shielded heating elements fitted on the sides.
- Power rating 800 W (1 pile), 1500 W (2 piles), voltage 230 V.
