

# Care In Use

# rafters

The combinations of the modular buffet system are limitless, but how do you care for this material? This care in use guide has been created to provide you with peace of mind & maximum product life.

Only sustainable wood and metal of the highest quality are used to create Rafter. Made from durable Acacia Wood and coated with a food-safe lacquer to provide maximum protection, this finish is further complemented by stunning copper handles and feet in the Grip & Fusion ranges.

## Uses

- ✓ Always store products at room temperature in a dry place
- ✓ Products are food-safe and are suitable for use with food, but always follow the cleaning guide below
- ✓ Suitable for hot food displays straight from the oven as product is heat resistant & treated

## Misuses

- ✗ Do not use in ovens, freezers, microwaves or dishwashers
- ✗ Do not place or store near any high heat sources such as ovens or open flames and grills
- ✗ Do not leave in direct sunlight for long periods

## Cleaning Guide

Wipe wood and copper accents clean with only a damp cloth. Be careful not to soak or submerge the products in water. Occasionally rub with a food-safe mineral oil to prevent the wood from drying out. To sanitise, wash wood with a solution of 5 parts water to 1 part vinegar. Remove odours from wood by lightly rubbing with table salt & lemon juice. Always dry immediately & thoroughly.
